# WE PROMISE TRANSPARENCY, QUALITY AND TIME.

---

From design and engineering to construction and management, Edwags' specialized learning, local partnerships, and expansive market experience enable us to deliver specialized services over the whole project life cycle.

Edwags (Pvt.) Ltd is Lahore's leading architecture, interior designing, and construction company. We are dedicated to creating projects with a positive impact on users, the environment, and the surrounding community. Founded by a team of seasoned architects and interior designers, Edwags works on residential projects of all scales, from individually crafted houses to strategic master plans.

We adopt a collaborative and explorative approach that draws on our collective experiences and interests. Our work is developed following careful analysis of context, informing architecture that is sensitive and appropriate to its place.

## OUR SERVICES

### .01 Architecture

Live a Lifestyle

Our architecture fascinates our clients and communities and helps them live a lifestyle that fulfills their needs and aspires them to be happy. We give shape and significance to rooms, structures, scenes, and urban areas – continually adjusting interior capacities with external demands of site, atmosphere, and culture.

Despite the fact that examination and investigation are vital but innovation makes things evolve. Edwags' approach is at the center of this happiness-focused process. Our team's multi-cultural experience and geographical knowledge help us deliver solutions which create real value.

Edwags' architecture solutions result from a collective process that urges our multidisciplinary groups to examine options, share knowledge and envision better ways to solve the challenges of our environment.

## OUR SERVICES

### .02 Interior Design

Aesthetically  
Creative Experience

Vital to a fruitful building is an interior that supplements the exterior. The person-in-charge of creating coherence between interior and exterior is an interior designer, who must coordinate the two spaces while guaranteeing an aesthetically creative experience by means of striking visual interest, easy utility, and preeminent comfort.

Edwags has the largest “best” team consisting of interior designers and creators – the largest firm of its type in Lahore, Pakistan – who work with our architects and builders to create spaces that give exquisite look and feel throughout.

**Our interiors feature minimalist themes and can be found in all residential properties, all across Pakistan.**

## OUR SERVICES

### .03 Renovation

## Versatile Renovation

We look for the most ideal approaches to regard a house's unique plan when making changes and increments. Our work respects a site's past while supporting the present and enhancing for what's to come. Our versatile renovation services change whole site, reviving abandoned homes, and conveying recharged imperativeness and chance to networks around the communities.

Edwags Renovations involves reexamining existing structures for new and better use. We start by distinguishing the characterizing qualities of a given structure and afterward envisioning how those highlights may imaginatively fill new needs.

## OUR SERVICES

### .04 Project Management

From Idea Through  
Fruition

Vast projects require the administration, coordination, and joining of numerous, simultaneous assignments. From idea through fruition, we give vital specialized and managerial services to enable our customers to meet their program destinations. We go about as an expansion of our customers' staff, ensuring their interests as our own.

#### **Program Management and Construction Management Services:**

- Program Planning and Management
- Master Budget Development
- Design Management
- Cost Management
- Delivery and Contracting Strategies
- Value Engineering
- Cost Estimating
- Commissioning
- Life Cycle Assessments

As an industry pioneer in program management and development services for all-scale projects, Edwags manages exercises extending from arranging, coordination, planning and cost control, to outline, development and delivery.

## OUR SERVICES

### .05 Sustainable Design

Create Extraordinary,  
High Performing Space

For us, planning for human and natural effect goes past checking boxes. We utilize existing accreditation frameworks as rules, not the end line, to tailor innovative answers for our customers' real estate goals, be it an individual building or a large portfolio. Our procedure makes extraordinary, high performing spaces and builds a long-lasting relationship with our customers.

Further to our commitment to sustainable design, we change and reuse of existing neighborhoods, grounds, waterfronts, mechanical destinations, and structures are a fundamental piece of our training and duty in diminishing our ecological effect. Adjusting and repurposing existing spaces adds lavishness and subtlety to the spots in which we live, work, learn, and recuperate. Today, we are

rehashing a portion of the world's most notable structures and locales. Our approach uses contemporary outline thinking to characterize new structures and rethink existing ones, repurpose relinquished framework, remediate destinations, and make lively open space.

**We enable customers to imagine bold sustainable design goals, then we set concise and clear subgoals to achieve the sustainable design goals.**

# Our Work

Create Widen Horizons

# Our Manifesto

At Edwags, we start each project by looking for the ways which make our lives healthier and happier. We take better design as the stepping stone to improve lives and deliver projects where the environment is inclusive and a better future is guaranteed.
